

Comcast runs two national designs that show up in local records: Xfinity Communities contracts signed by association boards and property owners, and public partnerships with counties, states, and housing authorities

The places below are the places a source names. They are examples, not a map of where Comcast is winning communities. Retrieved 28 Sep 2026. The case repo has Charter franchise language and an FCC location-lead comparison; it does not contain a Comcast HOA or local-government place list, and that location-lead file is not used here.

Public partnerships are not one sale. A subsidy build, a housing authority, and a cable-franchise renewal stay in different sections. Franchise renewal is not grouped with targeting.

Six posted contracts name a property; five are Florida because those associations posted the PDF or the audit

Xfinity Communities is the property channel: bulk internet billed through the property, managed Wi-Fi, and Connected Building service, with optional video. On these agreements the customer is the association and a board officer signs. Comcast’s party is Comcast Cable Communications Management, LLC or an operating affiliate. A one-time per-unit payment, where the page prints one, is consideration for access and the contract, not an annual royalty. Florida clustering is a posting pattern, not evidence that Florida is the strategy. Pearland is the single-family HOA in the set.

Place	Units	Buyer	Term / date	What is sold	Payment to the association	Source
Village Brooke Condominium, 3247 Beneva Rd, Sarasota, FL	320	Condo association. President signs. Comcast signer: VP, Market Development Florida.	Effective 20 Dec 2025. 6 years 4 months, then 2-year renewals.	Bulk X1 Popular TV and Fast internet. Exclusive marketing for TV, internet, and voice. Exclusive home-run wiring. Three common-area Wi-Fi access points where plant already exists.	\$100 per unit (\$32,000)	Association PDF
Summerhouse Beach & Racquet Club, 8550 A1A South, St. Augustine, FL	256	Condo association. HOA president signs.	Effective 15 Jan 2023. 5 years 7 months from March 2023.	Bulk service. Exclusive marketing.	\$100 per unit (\$25,600)	Association PDF
Aquavista, 17155 Front Beach Rd, Panama City Beach, FL	84	Owners association.	Effective 15 Jun 2020. Five-year bulk term from September 2020, then 2-year renewals.	Bulk TV and internet. Exclusive marketing for TV, internet, and voice. Exclusive home-run wiring.	Not printed	Association PDF
BellaVita at Green Tee, 1548 N Riviera Cir, Pearland, TX	617	Homeowners’ association. President signs.	Effective 1 Apr 2020. Five-year bulk TV and internet through 31 Mar 2025, then 60-day renewals unless notice is given.	Bulk TV and internet. Exclusive marketing. Door-to-door only with the association’s consent.	Not printed	Signed renewal
Symphony Master Association, Fort Lauderdale, FL (South 151, North 187)	338	Master association, audited financials.	Agreement 28 Nov 2018, 105 months. Video bulk from 1 Sep 2019. 2024 statements still recognize cable income and a remaining deferred balance.	Video bulk service plus high-speed internet.	\$200 per unit (\$67,600), deferred over the contract life	Audit, year ended 31 Dec 2024
Aquarius Condominium, 2751 S Ocean Dr, Hollywood, FL	269	Condo association.	Installation and services agreement and bulk addendum dated 1 Sep 2018. Term 66 months.	Bulk video and Performance-tier internet. Access and a non-exclusive easement. Association agrees not to market similar services. Door-to-door barred.	\$150 per unit (\$40,350)	Posted contract

“Not printed” is not a zero. Aquavista and BellaVita do not print a payment to the association. Service prices on the face of contracts are a different number: Pearland internet \$25.00 and TV \$17.50 plus a broadcast fee; Hollywood internet \$33.99. Those are contract terms, not a national rate card, and not door fees. BellaVita’s Comcast notice address is Houston; the community on the page is Pearland. Florida law, via a law-firm explainer and not a Comcast statement, lets a bulk contract and exclusive marketing coexist with a resident’s right to buy from another franchised provider.

Four subsidy builds name a county or a state; each dollar stays as that source printed it

The fiscal 2025 Form 10-K says Comcast partners with local, state, and federal agencies where subsidies are available, and that Comcast keeps the network. In Madison, the county is a funder and permitting partner. That is a different sale from an HOA bulk bill. Madison's estimate, Comcast contribution, and county contribution are not added together. Stafford's 600, 650, and nearly 700 home counts are not one number.

Place	Buyer	What is built	Dollars as printed	Source
Madison County, MS. Separate from a 2015 cable franchise the agreement cites.	The county.	Design, build, own, and operate a fiber EPON network. HFC only where unserved addresses sit next to existing plant. About 3,175 premises along 478.6 plant miles. Speeds described as at least 100/20 Mbps and capable of gigabit. Comcast keeps ownership and operations.	Project estimate \$18,994,203. Comcast contribution up to \$4,790,292. County contribution up to \$10,000,000. Further state and federal applications contemplated. Stated separately; not summed.	County–Comcast agreement, effective 6 Sep 2022
Stafford County, VA (Hartwood and Rock Hill districts)	County Board of Supervisors, with a Virginia Telecommunications Initiative grant.	Network extension to unserved or underserved homes. Later county page: completed in early 2024, Xfinity speeds up to 1.2 Gbps.	County release: a \$5.7 million project, \$3.4 million VATI, \$1.5 million county match, balance from Comcast, more than 600 homes. Later county page: more than 650 homes. Comcast's later story: nearly 700 homes. Not collapsed into one count.	County news 19 Jan 2022; county completion note; Comcast story
Fort Bend County, TX (Kendleton, Needville, Thompsons, Simonton)	County leaders in a public-private partnership supported in part by ARPA.	Fiber internet to thousands of homes and businesses, plus the Xfinity and Comcast Business product set. Completion by the end of 2026.	\$18.9 million project, as Comcast states it.	Comcast story 3 Apr 2026, referring to an announcement the prior November
Franklin County, ID (Preston, Franklin, and nearby communities)	State of Idaho, via the Idaho Capital Projects Fund Broadband Infrastructure Grant. City officials are quoted; the funding counterparty in the release is the state.	Fiber so addresses can buy Xfinity Internet and Mobile and Comcast Business Internet and Mobile. "Thousands" of homes and businesses. Completion expected early 2026.	No dollar figure in the release.	Comcast announcement, 28 Oct 2024

Comcast's Massachusetts housing award is \$12,932,384 for 5,179 units; St. Paul and Marin are separate housing-authority deals

The buyer is a housing authority or an affordable-housing operator, sometimes with a city, county, or state paying.

Residents are not the contracting party. The four-provider Massachusetts total is not Comcast's, and private operators on that award are not housing authorities.

Place or program	Buyer	What is sold	Dollars as printed	Source
St. Paul Public Housing Agency hi-rises, Minnesota. Start at Central and Montreal, then 14 more hi-rises.	Public housing agency. PHA called itself the first housing authority in Minnesota in this arrangement. Comcast speaker: a Midwest region vice president.	Pre-installed connectivity. Each unit receives a free modem at no cost to the PHA or the tenant. Not an HOA board vote.	No contract dollar in the PHA account.	PHA news, event 11 Jun 2024
Marin Housing Authority, California: Kruger Pines, Homestead Terrace, Golden Hinde, Venetia Oaks, and Casa Nova.	Housing authority. County information services uses ARPA funds to pay MHA, which pays Comcast. The county department is not a party to the Comcast contract. MHA had already contracted with Xfinity Comcast.	Broadband at the five named properties.	Up to \$20 per month per interested resident for two years.	County agreement, 23 Jul 2024
Massachusetts Residential Retrofit Program. Comcast slice only.	State grant through the Massachusetts Broadband Institute. Comcast Cable Communications. Housing authorities named below, plus private and nonprofit operators.	Income-eligible plans of at least 100/100 Mbps, common-area Wi-Fi, on-site digital-navigation training through a third party, and open access to in-building wiring. Open access is a different wiring bargain from the exclusive home-run terms in the Florida and Texas association contracts. Funding is U.S. Treasury Capital Projects Fund money under ARPA.	\$12,932,384 for 5,179 units. The same release awards \$31,548,018 across four providers for more than 13,700 units. That statewide total is not Comcast's.	MBI release, 6 Aug 2025

Housing authorities named on Comcast's portion of the Massachusetts award

Unit counts as published. Some rows were blank in the release. This table is only the housing-authority names, not every Comcast row.

Housing organization	Municipality	Units in the release
Lawrence Housing Authority	Lawrence	659
Chelsea Housing Authority	Chelsea	566
Saugus Housing Authority	Saugus	313
Melrose Housing Authority	Melrose	155
Aquinnah Wampanoag Tribal Housing Authority	Aquinnah and Chilmark	28 listed at Chilmark; Aquinnah count not printed

Private and nonprofit operators (Beacon, Corcoran, The Neighborhood Developers, and others) account for many of the other Comcast units, including large Boston, Chelsea, and Lowell rows. The full operator-and-city table is on the MBI release. Those rows are not treated as housing authorities.

Not this

Clark County, Washington is a franchise renewal, not a broadband-expansion sale. Clark County and Comcast Cable Communications Management, LLC entered a nonexclusive cable franchise effective 1 Jul 2024 through 30 Jun 2034, succeeding a 2013–2023 franchise, including public-access obligations. County franchise posted by the City of Vancouver: https://www.cityofvancouver.us/wp-content/uploads/2024/07/2024-05-01_County_Franchise_Ordinance_-_County_and_Comcast_Signed_compressed.pdf .

Lift Zones are mostly nonprofits. Free Wi-Fi and devices at community sites, part of Project UP: launched in 2020, passed 1,250 locations, \$50 million cash and in-kind for flagship sites powered by Comcast Business. The 1 Oct 2025 flagships are Aspire Center, Chicago (Austin); Building Bridges Across the River at TheARC, Washington, D.C.; Opportunities Industrialization Center, Philadelphia; Hmong American Partnership, St. Paul; and El Centro de la Raza, Federal Way. That release also names 2024 flagships in Atlanta, Houston, and Oakland. The D.C. site is the one flagship with a named local-government partner: a \$1 million Comcast commitment as connectivity partner for the 11th Street Bridge Park, with the District Department of Transportation. Hinesville, Georgia (18 Sep 2024) is the Liberty County Boys & Girls Club; the counterparty is the club. Comcast release, 1 Oct 2025: <https://corporate.comcast.com/press/releases/comcast-expands-access-technology-wifi-launch-five-new-flagship-lift-zones> . Comcast South, 18 Sep 2024: <https://south.comcast.com/2024/09/18/comcast-announces-newest-lift-zone-at-the-liberty-county-boys-girls-club/> .

The fiscal 2025 Form 10-K does not break out bulk, MDU, or community-association revenue. Franchise-fee language in that filing is about cable franchises, not HOA door fees. EDGAR, year ended 31 Dec 2025: <https://www.sec.gov/Archives/edgar/data/1166691/000162828026004994/cmcsa-20251231.htm> .

Nothing sourced connects these contracts to Spectrum households. None of these sources says Comcast is taking Spectrum households through an HOA or housing-authority deal. The association contracts that name an address are inside communities Comcast is already serving. The expansion contracts are written as builds to addresses that lacked service.
