

Analysis, not a launch recommendation

Internet is already the mix at 42.7% of revenue, the print is still falling (–166,000 residential customers in Q2 2026), and EH&B only matters if it adds a residential Internet PSU on plant already built

A corporate or broker benefit counts only when a billed residential Spectrum Internet account opens on plant already passed. Productivity is the pitch. The commercial count is still M13: provisions, minus customers who already have Spectrum, minus same-quarter disconnects when the job ends. Official Rec 1 is unchanged: fill the quarterly residential-Internet net-loss tracker first, then one reason-play on existing-plant core homes.

Residential Internet was 42.7% of company revenue in Q2 2026, ahead of video at 23.3%

Share of company revenue. Internet, mobile service, video, and voice are the residential lines (\$5,776 / \$1,095 / \$3,149 / \$331 million) and sum to \$10,351 million of residential revenue — Internet is 55.8% of that subtotal. Commercial, advertising, and other are kept so 42.7% is a share of the company, not of a trimmed base. Q2 2026 Internet is \$5,776 million of \$13,526 million (42.7%). Mobile service excludes device sales. Source: CHTR-Q2-2026-Earnings-Release-Ex99.1.md · Q2 2026 · \$ millions · shares recomputed in Analysis/ehb-unit-economics.

Period	Internet revenue (\$ millions)	Share of company revenue	Video share	Company revenue
FY2025	23,765	43.4%	25.0%	\$54,774 million
Q1 2026	5,852	43.0%	23.9%	\$13,597 million
Q2 2026	5,776	42.7%	23.3%	\$13,526 million

Same ratio, three reported periods. Q1 2026 Internet is 43.0% of \$13,597 million (\$5,852 million; CHTR-Q1-2026-Earnings-Release-Ex99.1.md). FY2025 Internet is 43.4% of \$54,774 million (CHTR-FY2025-Earnings-Release-Ex99.1.md). Q2 is the exhibit: 42.7% of \$13,526 million.

93.4% of residential relationships already take Internet

Percent of 29,276 thousand residential relationships at 30 Jun 2026. Internet 27,358 thousand (93.4%), video 12,010 thousand, voice 4,494 thousand. The 1,918 thousand relationships without Internet (29,276 – 27,358) are a stock remainder, not an EH&B opportunity. Residential mobile lines were 12,099 thousand and are omitted here because a line is not a relationship. Source: CHTR-Q2-2026-Earnings-Release-Ex99.1.md · 30 Jun 2026 · thousands.

Residential Internet net adds stayed negative for 10 straight quarters, to –166,000 in Q2 2026

■ Residential Internet net adds (000s). Bars originate at zero. Axis runs to –220 thousand so the losses stay visible. Q2 2026 is the last bar.

Thousands of customers. Scale from zero to –220. Q1 2026 is –117 thousand residential. Q2 2026 is –166 thousand residential.

Thousands of residential Internet customers. Ten-quarter sum is –1,186 thousand. Q1 2026 is –117,000 residential. The –120,000 figure is total Internet (–117 residential and –3 small business). Q2 2026 total Internet is –172,000. 24Q4–26Q2 from Ex99.1 operating statistics. 24Q1–24Q3 from CHTR-Q1-2026-Trending-Schedule.md, same prints in the FY2025 trending schedule. Video and mobile are in the table, off this chart: video's 2024 losses are larger, and mobile lines are a different unit.

Other products in the same quarters, off the chart

Quarter	Internet customers (000s)	Video customers (000s)	Mobile lines (000s)	Voice customers (000s)
24Q1	–72	–392	+470	–274
24Q2	–154	–393	+534	–268
24Q3	–113	–281	+521	–275
24Q4	–171	–110	+504	–259
25Q1	–55	–167	+488	–264
25Q2	–111	–73	+471	–211
25Q3	–108	–64	+462	–194
25Q4	–119	+49	+406	–135
26Q1	–117	–51	+344	–167
26Q2	–166	–11	+385	–171
Ten-quarter sum	–1,186	–1,493	+4,585	–2,218

Internet, video, and mobile line net adds are RETRIEVED. Voice net adds are DERIVED from the change in published ending residential voice customers; the filing does not print a voice net-add line. Mobile lines added in every quarter shown. A line does not close a residential Internet loss. Do not add the sum row across columns. Q1 2026 residential Internet net adds are –117,000. Q2 2026 residential Internet net adds are –166,000. Sources match the Internet series above.

Principal is \$93.8 billion at 4.18x, and no contribution dollar per Internet PSU is published

Mixed units stay in a table. The blended residential bill is not an Internet margin, and programming cost is a video cost that is already falling in dollars. Blank rows are not estimates.

Item	Value	Unit	Period	Tag

Subsidy tied to this channel	—	\$	—	NOT IN FILING

Blended monthly residential revenue per residential customer is \$117.52 in Q2 2026: total residential quarterly revenue divided by three divided by average residential relationships. It is not Internet ARPU. 10-K prose rounds programming to about \$8.8 billion and \$9.7 billion, and the shares to 27% and 29%; the table uses \$8,822 / \$32,739 = 26.9% and \$9,653 / \$33,167 = 29.1%. Passings include business sites, and 53.4% includes small-business relationships (31,499 / 58,981). That is plant scale, not a dollar per PSU. Every dollar shown is RETRIEVED. Blank rows are withheld, so they carry no estimated dollar weight. Sources: CHTR-Q2-2026-Earnings-Release-Ex99.1.md, CHTR-10-Q-Q2-2026.md (4.18x), CHTR-10-K-FY2025.md note 15 and the income statement. Principal \$93.8 billion, leverage 4.18x, cash \$509 million, all at 30 Jun 2026.

What this means for EH&B

The product. The channel has to move a billed residential Internet account. Video, voice, and mobile lines do not close M13. At 30 Jun 2026, 93.4% of residential relationships already take Internet (27,358 thousand of 29,276 thousand), so a sale to someone who already has Spectrum is a transfer, not a provision.

The trend. Residential Internet net adds were negative in all 10 quarters from Q1 2024 through Q2 2026. Q1 2026 was –117,000 residential. Q2 2026 was –166,000 residential. A consumer price-card fight is the wrong tool against that print: principal was \$93.8 billion at 4.18x on 30 Jun 2026, cash was \$509 million, and FY2025 interest expense, net was \$5,042 million.

The published cost fact. Video programming fell from \$9,653 million (29.1% of operating costs) in FY2024 to \$8,822 million (26.9%) in FY2025. That is a video content cost. The filings do not publish an Internet contribution margin.

The blanks. Contribution per incremental Internet PSU, CAC, employer take-up, broker commission, and any subsidy for this channel are blank. Passings were 58,981 thousand and published penetration was 53.4% on 30 Jun 2026. That is the plant an incremental residential Internet PSU would sit on. It is not a dollar contribution.

Outside this channel, and outside this exhibit

Rural build economics are a different motion. Mobile line growth is an MVNO count and does not stand in for a residential Internet PSU. Video reattach is a different product. The locked team score marks EH&B as Works on fiber (play 2) and non-pay (play 5). An earlier validation said No on those two plays. This exhibit keeps the team score and does not treat either play as proven.

Workbook: Decisions/EH&B/MASTER.xlsx sheets Product Mix, Product Trends, and Unit Economics. Computation: Analysis/ehb-unit-economics/build_mix_trends_unit_economics.py. Canvas figures match those sheets. No estimate enters the dollar figures. No CAC and no contribution per PSU are invented here.
