

Charter leads Comcast on residential locations served in 19 states; Comcast leads in 27, by 5.5 million units in New York and 4.4 million in Pennsylvania

Metric: share of residential units at FCC Broadband Serviceable Locations where Charter Communications (Spectrum, provider ID 130235) or Comcast Corporation (Xfinity, provider ID 130317) reports residential fixed broadband availability. Estimated units = that share × the state's residential fabric units. Beating = strictly larger share. This is availability / locations served — not subscriber share.

What this is not

Not subscriber share, not Form 477 subscriptions, and not small-firm employment. Company 10-Ks do not publish state subscriber counts; national mix is not allocated to states. A location the provider can serve is not a customer. Charter files in 42 states on this vintage; Comcast in 41. Neither operator reports a positive residential footprint in Alaska, Iowa, North Dakota, Oklahoma, or South Dakota.

Largest unit leads: New York for Charter, Pennsylvania for Comcast

Top 10 Charter leads and top 10 Comcast leads, sorted by Charter-minus-Comcast margin. Bars start at zero. Units are estimated residential locations served, millions.

■ Charter unit lead (M) ■ Comcast unit lead (M)

Estimated residential units served, millions. Axis starts at zero. Source: FCC Broadband Data Collection, National Broadband Map, as of 31 Dec 2025 (D25), file revision 15 Sep 2026 — provider summary by geography × state residential fabric units.

Five largest Charter leads

State	Charter	Comcast	Margin	State fabric
New York	5.58M · 60.2%	44k · 0.5%	+5.54M	9.27M
Ohio	4.51M · 77.3%	97k · 1.7%	+4.41M	5.83M
North Carolina	4.37M · 79.0%	2,211 · <0.1%	+4.36M	5.53M
Texas	6.81M · 48.8%	3.05M · 21.8%	+3.76M	13.95M
Wisconsin	2.35M · 74.5%	39k · 1.2%	+2.31M	3.15M

Fabric units are the state’s residential Broadband Serviceable Location units (the denominator). Hawaii covers 92% of a 604k-unit state (+557k) — a high percentage, a small lead next to New York.
