

Descriptive rates

Not a sizing

RETRIEVED only

Usually-WFH spans 16.7 points across states — D.C. 22.9% vs Mississippi 6.2%

Denominator for the headline and state table: workers 16+ whose usual means of transportation to work was “worked from home” (ACS journey-to-work). Seniority and firm-size exhibits use different official surveys and say so on the exhibit. One decimal on charts; full precision in Analysis/work-from-home/out/.

What this changes for the benefits analogy

The corporate → consumer Internet analogy only lands a Spectrum residential account if the employee actually works from home. These rates show that “home as workplace” is concentrated — by state, by occupation/earnings (seniority proxies), and at large firms — so any employer-provisioned home broadband motion is not a uniform share of all workers.

United States — usually worked from home

13.3%

US usually-WFH rate

165.4M

Workers 16+ (denominator)

22.0M

Usually worked from home

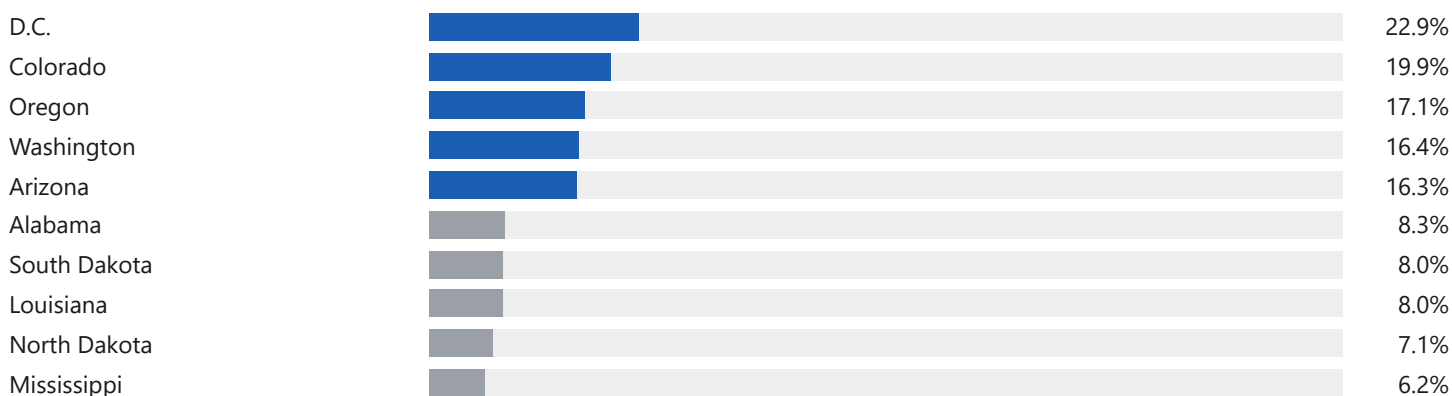

Counts: 22,026,372 worked from home ÷ 165,360,450 workers 16+ = 13.3% (exhibit rounding to 1 decimal; CSV full precision 13.320218%)

Seniority proxies: management 48.1% and top earners 51.0% work at home on days worked — vs 10.5% in service jobs

Different source and definition than the state table

Official surveys do not publish WFH by job level (VP vs individual contributor). Closest published cuts are occupation, usual weekly earnings quartile, and education — labeled here as seniority proxies. ATUS counts any work at home on days worked (2024), not ACS “usually worked from home.”

Also: bachelor's+ 50.0% vs high-school no college 17.8%; full-time 33.4% vs part-time 27.9%; ATUS overall 32.5% of those who worked that day. All figures are % of employed persons who worked on an average day.

Source: U.S. Bureau of Labor Statistics, American Time Use Survey (ATUS) — Tables 6 and 7, 2024 annual averages (news release); year 2024. Question/variable: Employed persons who worked at home on an average day as percent of employed persons who worked on an average day; 'Working at home' includes any time persons did work at home and is not restricted to persons whose usual workplace is their home. Persons 15+. Table 6: education / full- vs part-time. Table 7: occupation / usual weekly earnings quartiles (full-time wage and salary, single jobholders).. URL used: https://www.bls.gov/news.release/archives/atus_06262025.htm · Also: https://www.bls.gov/news.release/archives/atus_06262025.pdf. 77.5% of firms with 500+ employees had any WFH workers — vs 35.8% of firms under 500

Different source — firm-level, not worker-level

This is the share of employer firms that reported having employees who worked from home (ABS WORKHOME), not the share of workers at small vs large firms who WFH. ACS/ATUS do not publish a worker×firm-size cross; that break was not invented. Bins are EMPSZFI 655 (<500) and 657 (500+) — the SBA cutoff used elsewhere in this project.

77.5%

Firms 500+ with any WFH employees

35.8%

Firms <500 with any WFH employees

■ % of firms that had employees who worked from home

Source: U.S. Census Bureau, Annual Business Survey (ABS) Characteristics of Businesses — ABSCB2023.AB2300CSCB04 (Sex/Ethnicity/Race/Veteran × Employment Size of Firm); year 2023. Question/variable: QDESC=B28 WORKHOME; BUSCHAR=EWA 'Business had employees who worked from home' as percent of BUSCHAR=EWTR 'Total reporting' (FIRMPDEMP_PCT). EMPSZFI 655 = firms with less than 500 employees; 657 = firms with 500 employees or more. Firm-level (had any WFH employees), not worker WFH rate.. URL used: <https://www2.census.gov/programs-surveys/abs/data/2023/AB2300CSCB04.zip> · Also: <https://data.census.gov/table/ABSCB2023.AB2300CSCB04>. Funded by: U.S. Census Bureau (federal statistical agency).

Source conflicts and breaks refused

Definition conflict (not an error)

ACS US usually-WFH is 13.3% of workers 16+. ATUS US any-work-at-home on days worked is 32.5%. Both are official; they answer different questions. State rankings use ACS only. Seniority uses ATUS only. Firm size uses ABS firm-level only.

Refused to invent

- Job title / corporate seniority ladder (VP vs IC) — not in ACS, ATUS, or ABS.
- Worker-level WFH rate × firm size <500 vs 500+ — ABS is firm-level; no industry-mix imputation.
- Hybrid vs fully remote worker shares by state — not in ACS B08301; ATUS day-level “any time at home” is not a hybrid schedule measure.
